LinkedIn: linkedin.com/in/kapil-dev-b90629290 | Portfolio: https://kapildev5262-portfolio.vercel.app/

Professional Summary
Blockchain developer with expertise in Ethereum and Stellar ecosystems, proficient in building decentralized applications (dApps), writing secure smart contracts, and developing end-to-end blockchain solutions. Skilled in React.js, Solidity, Rust, and JavaScript with hands-on experience in DeFi and NFTs.

Professional Experience.
Internship (Fullstack Blockchain Developer)

AppAvengers | January 2025 – Present
- Collaborating on innovative blockchain projects as part of a remote team.
- Leveraging Stellar Blockchain and Rust to build secure decentralized applications.
- Developing smart contracts on Ethereum using Solidity and JavaScript.
- **Tools & Technologies**: Foundry, Rust, Solidity, React.js, Blockchain.

Trainee Software Engineer (Fullstack Blockchain Developer)

Kuboloitte Services Private Limited | October 2024 – January 2025
- Developed decentralized applications (dApps) and smart contracts using Solidity.
- Built full-stack applications using React.js/Next.js and Node.js for blockchain interactions.
- Ensured secure blockchain interactions via Web3.js and decentralized storage.
- Tools & Technologies: JavaScript, Node.js, Solidity, React.js, Blockchain.

Intern (*Bharat Sanchar Nigam Limited (BSNL) | May 2023 – June 2023***)**

Education
- **B.Tech, Electronics & Communication Engineering**, CSJM University, Kanpur (2020–2024)
- **Intermediate – CBSE**, Maheshwari Public School, Kota, Rajasthan (2018–2019)
- **High School – CBSE**, Jawahar Navodaya Vidyalaya, Aligarh, UP (2016–2017)

Key Projects
Token World – No-Code Token Deployment Platform *(link)*
- A platform allowing users to deploy ERC-20 and ERC-721 tokens on desired blockchains.
- Enables token deployment without writing or deploying smart contracts.
- Features multi-account token distribution for efficient transfers.
- *Technologies*: Solidity, Hardhat, Ethers.js, Web3.js, React.js.

Stellar Cross-Border Payment Solution
- Full-stack application leveraging Stellar blockchain for near-instant cross-border payments
- Implemented multi-currency support, trustline management, and custom asset creation
- *Technologies:* Node.js, Express.js, React.js, Stellar SDK, Horizon API

Task Management Smart Contract on TON Blockchain
- Developed decentralized task management system with reward distribution using FunC
- Created comprehensive testing suite ensuring contract reliability and security
- *Technologies:* FunC, TON Blockchain, Blueprint, TypeScript, Jest

Other Notable Projects:
- **Fullstack-Hardhat-Smart-Contract-Lottery**: Decentralized lottery using Chainlink VRF
- **Krishna-Funds**: Blockchain fundraising platform with Chainlink price feeds
- **Decentralized Voting & Auction Platforms**: Ethereum-based transparent systems

---

Technical Skills
- **Languages:** Solidity, Rust, JavaScript
- **Blockchain:** Ethereum, TON, Stellar, Solana, DeFi, NFTs
- **Tools:** Hardhat, Foundry, Anchor, MetaMask, Phantom Wallet
- **Web Development:** HTML, CSS, JavaScript, React.js, Next.js, Node.js
- **Software:** MS Office, Git, VS Code

Languages
- English (Fluent), Hindi (Fluent), Punjabi (Professional)
